

In The Specification

Please amend the second full paragraph appearing on page 11 of the specification as follows:

EX1
Figure 5 shows a partial cross-sectional view of a web engaging assembly 70 as taken along lines 5-5 of Figure 3. An aperture 78 for a transfer pin pivot shaft 30 or 31 is shown near the top of Figure 5. The clamp 71 of Figure 5 is not shown, however, in Figures 3 or 4. The web engaging assembly 70 includes a clamp 71 securely connected to the unitary elongated mandrel 65. The spacer 64 provides a predetermined and appropriate gap 81. The gap 81 functions to receive a severing mechanism, such as for example a chopper blade 62 82 (see Figures 6-7) when the web is severed, as further described below.
